WEB DEVELOPMENT ACTIVITY

Consolidated Project Report

Overview

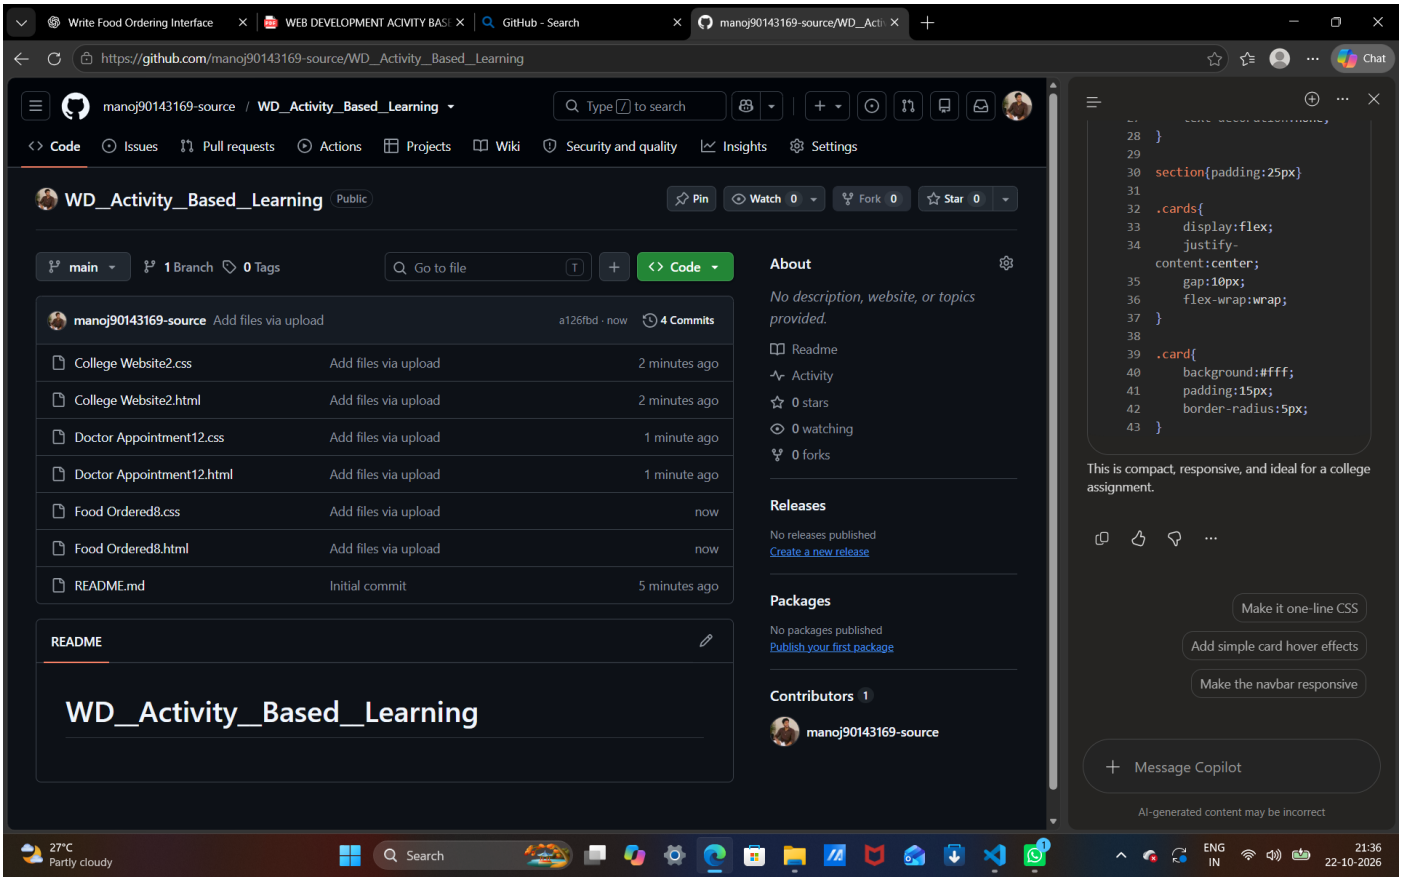

This report consolidates four screenshots documenting the web development activity: the GitHub project repository, college website, doctor appointment interface, and food ordering interface.

Project Contents

1. GitHub repository and uploaded project files
2. ABC College website interface
3. Healthcare doctor profiles and patient registration form
4. Food restaurant menu and ordering interface

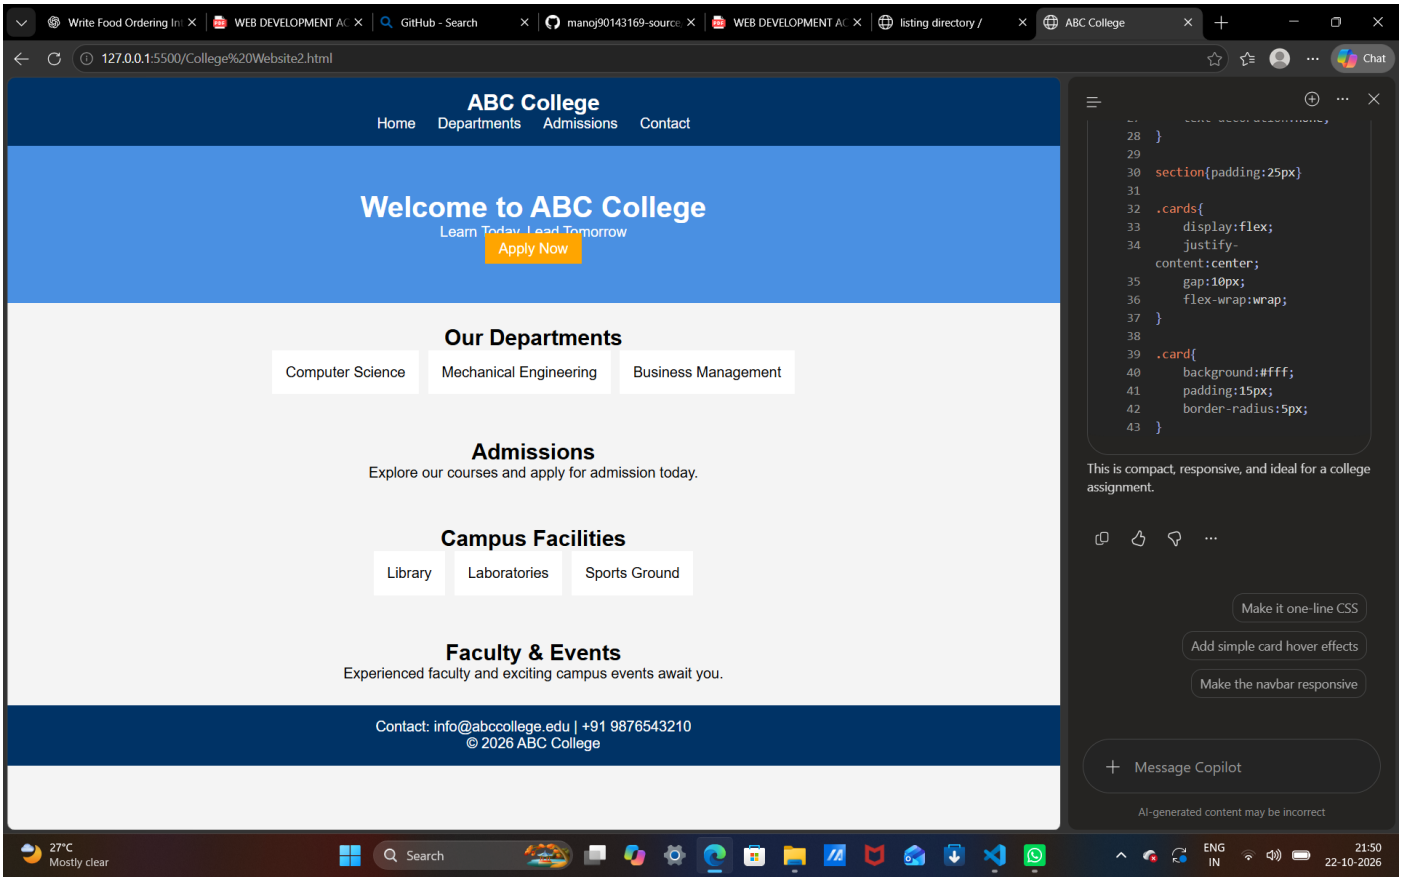

1. GitHub Repository

The repository contains the HTML and CSS files for the college website, doctor appointment page, and food ordering page, along with a README file.

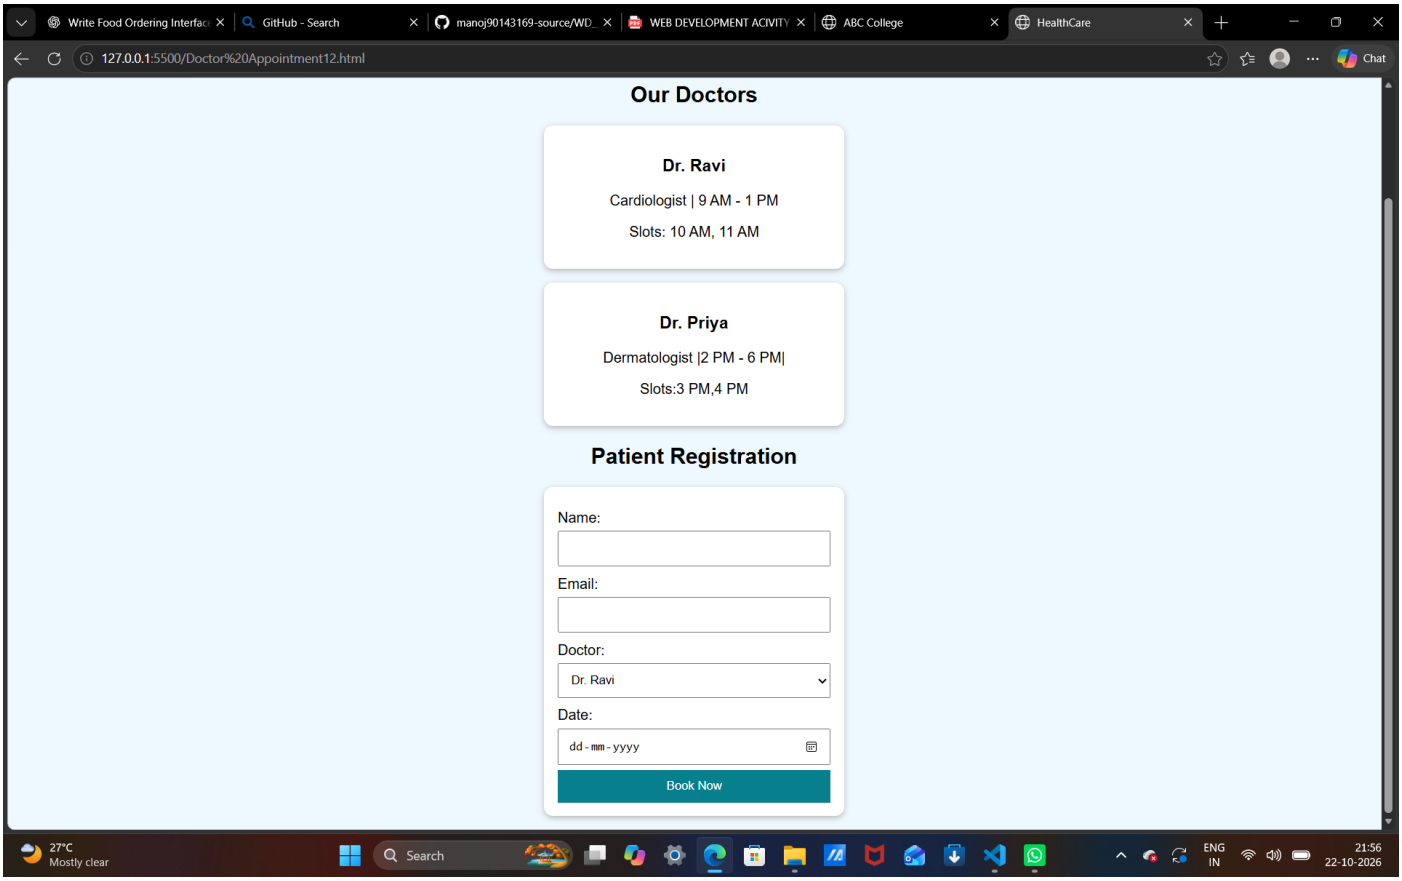

2. College Website

The college website presents navigation links, a welcome banner, departments, admissions information, campus facilities, faculty and events, and contact details.

3. Doctor Appointment Website

The healthcare interface displays doctor profiles, specializations, consultation timings, available slots, and a patient registration form with name, email, doctor, and date fields.

4. Food Ordering Website

The food ordering interface includes restaurant branding, navigation, a special offer, food cards with images and prices, order buttons, customer reviews, and a footer.
